

News Letters - October 2013

Dear Reader

Why Travel by Coach?

Coaches are safe. The department of transportation reports that Coaches are twice as safe as flying and 46 times safer than driving a car.

Coaches reach more destinations. Coaches take you right to the doorstep of your destination. Planes and Trains only take you to the nearest stop.

Coaches allow mobility. Coaches are available to transport your group around for your entire stay.

Coaches are the most fuel efficient. Coaches only use 797 BTU's per passenger mile compared to planes using 4847, trains using 2450, and cars using 3639.

Coaches are better for the environment. Because of their fuel efficiency, Coaches are better for the environment than most other alternatives.

Coaches are inexpensive. Chartering a Coach is typically half the cost of flying, not including benefit that Coaches provide local travel.

You can view our coaches in these categories on our website www.coachman-coaches.co.za

Happy coaching!

Sonja and Thinus le Roux
