Safety on the Roads

The only things you should bring back from your holiday are good memories.

1. Do a quick vehicle check before setting off.
2. Take a break after 2 hours or 200kms.
3. Avoid small, loose items which could obstruct the pedals.
4. Play upbeat music and keep up spirited conversation to stimulate your driver.
5. Have your passengers use the GPS or maps to keep the driver focused.
6. Pack goodie bags including crayons, books & snacks to avoid bored kids.

Quick Vehicle Check

5 minutes could mean the difference between a smooth ride and an emergency stop.

1. Tyre Pressure – Tyres should appear well-rounded, not flat or over-pumped.
2. Wipers – Try your wipers on all settings before hitting the road.
3. Mirrors – Mirrors should be clean and free from cracks or other damage.
4. Fuel – Fill up before embarking on a journey to avoid possible road-side delays.
5. Temperature Gauge – Check your dial after a few minutes of driving. A hot car could indicate that you need to refill the water.
